November 2021

Dear Patient,

I am pleased to announce that on January 1, 2022, I will join the Faculty Group Practice at NYU Langone Health. This partnership allows me to continue providing you with the exceptional care you're accustomed to, while offering the expanded services and resources of NYU Langone Health. Being part of its outpatient network allows me to connect our patients with world-class NYU Langone specialists who treat a full range of medical conditions in the communities where my patients live and work. When inpatient care is needed, I bridge the gap between my practice and NYU Langone's hospitals in Manhattan, Brooklyn, or Long Island to provide a seamless healthcare experience. Rest assured that I am still here for you, but now as part of NYU Langone Health.

Electronic Medical Records

Consistent with NYU Langone's reputation as one of the nation's best hospitals, on January 1, my office will begin using Epic, an integrated medical information system. With Epic, your doctors have all of your medical records in one place, which allows for coordinated and efficient delivery of care, while meeting all HIPAA privacy and security requirements.

By downloading the NYU Langone Health app, you can manage your health digitally on MyChart, our secure patient portal, anytime, anywhere. With just a few clicks, you can schedule or change an appointment, send secure messages to your care team, view your test results as soon as they're available, order a prescription refill, and much more.

Your next visit

While I expect the transition to be a seamless experience for you, I ask that you validate the information we have in my new system, before your next appointment. If you don't have a MyChart account, please sign up by going online to mychart.nyulmc.org, where you can easily prepare for your upcoming visit. I look forward to continuing to provide you with world-class care at my new office location, NYU Langone Medical Associates—Chelsea, and to offering you expanded resources through NYU Langone Health.

Sincerely,

S.E. McDaniel, MD, FACOG
